

come back with confidence: our commitment to everyday wellness

A pristine workplace has always been part of Irvine Company's commitment to everyday wellness. For decades, we've integrated Industry-leading expertise and innovative systems into our workplace communities. Our ongoing investments in the latest wellness solutions ensure your clients can come to work with confidence today, tomorrow and beyond.

cleaning

We clean high-touch surfaces using EPA-registered disinfectants multiple times per day. We verify the effectiveness of our sanitization program with quarterly ATP testing, a method of swabbing surfaces and measuring their cleanliness. ATP testing is typically only used in medical facilities and restaurants, but we believe it's an essential part of our wellness commitment.

ventilation

75% of our workplace communities have MERV 13 or higher air filters, including 100% of our high-rises and 60% of our campus offices. Indoor air is flushed and replaced on average every 60 minutes. In our restrooms, air is replaced approximately 10 times every hour.

verified for wellness

Irvine Company is the first in the nation to have its workplace communities designated as Verified Healthy Buildings by UL[®], the global safety science leader. This includes **more than 36 million square feet of office space across 137 buildings** in Coastal California and Chicago.

signage

Signage throughout common spaces reminds customers to space safely, follow recommended path of travel and practice good hygiene to support a healthy workplace community.

return to the workplace toolkit

Help your clients kick-start their return planning process with our [toolkit](#) that includes a decision-making framework, step-by-step guide and customizable templates for employee communication.
